What type of machine was used to reproduce the original? What variances did it introduce to the original? Why "Perspective edition"? What does "CC-BY-NC" signify? Why was that chosen as a model? Under what circumstances was it written? How did the act of writing it affect the structural integrity of the paper? Why was this zine format chosen? How is it folded? How was it cut? Would another format have been better? What was employed to remove the guidelines used in making it?

What happened here?

Why this border?

Even the most everyday objects contain incalculable information that nobody can entirely grasp. Things like "the economy," or "human behavior," or "the ecosystem" are, in many ways, effectively unfathomable.

Intellectual humility is important.

Why did they do these?

What is the point of a zine? How did it get made? SHARP perspective edition inspiration What is the

From where was the pen obtained? What was done to make the writing even? What's the deal with the lines?

From what tree(s) was the paper sourced? What chemicals were used in its creation? Where was it made? By what path did this particular piece of paper get into your hands? Why is the author's handwriting like it is? Does he wish it were better? Is this zine the way he wanted it to be? What does the author hope to convey in all of this mess? Is he succeeding? What is the chemical makeup of the ink used? What advantages does that ink offer? What language is employed in writing this zine? What historical paths were taken to make that language dominant in the society in which the zine was produced? How was the zine format created? How did the author discover that format? Why did he take it up? How long did something like this take to make? How many copies were made and distributed? How many still exist? Who has them? Why do they have them? Where is the original?
